

Putonghua Question Bank — Review Brief

19,882 rows, every one traceable to a verified source · 30 items await your decision · Item detail in the companion Excel “PSC_Review_Master_2026-08-30”

1 · What was fixed

You reported items where two options were both correct, so a learner choosing a correct answer was marked wrong. That defect was traced to its source and removed everywhere it occurred — in the practice bank and, separately, in the RPG campaign, which carries its own question set and had the same problem in a worse form. The governing authority is the exam's own scoring basis: the official 《量词、名词搭配表》, whose parenthetical cross-listings state which alternates score correct, and the official 《普通话与方言常见语法差异对照表》, whose notation marks the standard option and even marks some groups with two correct answers.

2 · Where every item comes from

Section	Rows	Source
C1 Monosyllables	3,017	Official 2021 词语表, monosyllabic entries, with printed entry numbers
C2 Multisyllables	15,566	The same table plus the official 必读轻声 and 儿化 appendices
C3 Selection & Judgment	484	232 from the official 量词、名词搭配表 · 139 from the official 语法差异对照表 · 89 school-supplied · 15 corrections of those · 9 authored with externally attested Cantonese distractors
C4 Reading	50	All official 2021 works 1 – 50, verified character by character
C5 Speaking	50	The complete official 50-topic list (2024-01-01 edition)
C6 Drills	450	Official word-table entries carrying each target sound contrast
C7 Polyphones	265	Characters whose every official reading is illustrated by an official word
Campaign	211	The RPG question set, audited against the same official tables

Nothing a learner sees is invented content. Where an item was authored rather than taken from an official table, its distractors were attested against Cantonese dictionaries before shipping.

3 · What needs your decision (30 items)

Group	Count	What is asked
A · Re-key	3	The school's own answer key marks an ungrammatical sentence as correct (e.g. 他跳很好舞). We re-keyed it and recorded the discrepancy — please confirm.
B · Replacement advised	3	Every option is standard Putonghua, so the item cannot mark anything wrong (e.g. 他住上海 / 他住在上海 / 他在上海住). All are accepted for now; a replacement item would be better.
C · Extra accepted answer	24	A second answer is now accepted so a correct choice is no longer marked wrong — each backed by the official table's own cross-listing.

■ sheet “1 Decisions” in the workbook: dropdown Approve / Reject / Revise, plus a notes column.

4 · What we still need from the school

Document	Where	What it unlocks
《普通话水平测试用普通话与方言词语对照表》	p.253 of the official guide, 949 entries	Word-judgment items. This is the one thin part of the bank (44 items) — every mainland source was unreachable online, so items had to be hand-drafted and most were rejected in verification.

Document	Where	What it unlocks
The in-force 35-category 语法差异对照表	2024-01-01 edition	The 139 grammar items here come from the superseded 34-category edition and are stamped as such. The current edition also revised example sentences.

A photo or scan is enough — we parsed the table we do have directly from its printed notation.

Verification: every option text in the generated items matches its source table verbatim; every accepted answer set matches the official markings; no sentence is treated as correct in one item and wrong in another; the campaign has zero items with an unaccepted correct answer and zero duplicates.
